

Where Materials Flow by Design

Lean Material Flow Solutions

ProFlow™ Series

Flat Deck Carts

1350 Rockefeller Rd., Wickliffe, OH 44092, PH 440.943.4111, info@KtecInc.com, www.KtecInc.com

FLAT DECK CARTS

K-Tec flat deck carts deliver flexibility and top quality to complement **lean material flow** programs. Features include:

- Auto-Lock Deck w/Mechanical Linkage
- Auto-Release Floor Lock
- Rotational Deck Sealed Precision Bearings
- Choice of Two (2) Popular Deck Sizes
- Low Push/Pull Force 4 or 6 Wheel Systems
- Built-In Pocket For Pneumatic or Hydraulic Lifts

INDUSTRY LEADING DESIGN

Carts meet standard ergonomic limits for manual push/pull forces with heavy payloads and standup to tough loading conditions. FEA (finite element analysis) puts stiffness and weight where needed to produce carts as

light and rugged as possible. Innovations such as MPP™ (modified pivot point) caster steering allow significant improvements in tracking and turning resulting in low frame height and manual pushing capability. Numerous “attention to detail” features help K-Tec meet rigorous **safety**, reliability and durability standards. K-Tec ProFlow™ Series carts carry a **two (2) year warranty**.¹

COMMITMENT TO SUCCESS

K-Tec identifies and benchmarks relevant applications, addresses ergo/safety issues and provides on-site feasibility reviews where required. Application engineers are available by conference call or direct appointment to help walk through the early planning and front end design phase of lean material flow projects.²

Model Shown: KT2-37R on PL3000P lift

Model Shown: KT2-49R

K-Tec also designs ergo-support products such as lifts and conveyors to provide an integrated, dependable solution. A “try before you buy” **demo program** for qualified customers delivers a hands on look at a forklift free solution without wasting investment dollars.
